

## Intergalactic Securities & Management Corporation

### ISMC – Investment Opportunities

Intergalactic Securities is primarily directed to private investment that can be utilized in private and public securities, enterprise, technology and product development, with some of the most advanced strategic risk management in the world, stealth business and the kind of capabilities, integrity and vision that is nothing short of fantastic.

Intergalactic Securities can be a useful operating tool for private companies with simple or complex enterprise and capital structure. This can be utilized with or by a private investor or investment group, a registered agent or dealer, or even a securities analyst that may advise or work with an investor, investment or portfolio manager or other financial institution or operating entity.

Private or public reporting and transactions are enabled and can be optimized by the relevant people or enterprises in their contribution to new wealth generation, investment and asset management and also with crowd funding options.

For the individuals involved in a start up enterprise, investment opportunities, development and acquisition or even crowd funding initiatives, the awesome news of this resource to enable every possible advantage to be secured and deployed for the success of the enterprise, the investors, personnel and clients and customers.

It is possible we have eliminated many of the arguments and problems forwarded by the opposition towards greater economic, enterprise and individual creative power and created something beyond anything else that exists. This takes character, resourcefulness, resolution, integrity and dedication to fundamental principals. It is part of the alternate reality creation engine that is powering a vehicle in an environment conducive and supportive of the individual, enterprise development and supercharged industry, notwithstanding other elements.

It is also important to know, that many things can be done for different types of investing, financial and non-financial. This can involve resources, time or anything else. This can enable contributions and other types of non-investment type enterprise transactions to make more options for considerations for everyone. We expect to grow as we meet the challenges of the investment community and those enterprises that require capital to be more engaged in enterprise development and valuable members of society.

Although many accredited investors rely on proven management and cash flow, there remains a considerable market for those start up entrepreneurs and enterprise that are not at that more advanced and successful stage of business. Some may choose to do crowd funding, be a private issuer, work with one or more private or public investment groups, registered agents, dealers or public companies to get the resources they need. Some may go towards a public company or remain a private enterprise and even keep the option of an IPO, an initial public offering, possible with some planning, vision and operational capabilities in play.

We hope to work with those people with vision to create new wealth, to build something new. We don't slam ideas and projects because "your evaluation...blah, blah, blah" or "your cash flow, blah, blah, blah", "how many customers do you have? blah, blah, blah." Everyone is at a different stage of enterprise and idea development, that's ok.

If we can direct you to relevant options concerning people and enterprise, as there are many smart and successful people that can help with your project, with things you may not have thought of or figured out, this is good for you. We can do everything possible and state of the art so that you, your project, company and vision will be an overwhelming success. This is something we can work at together.

You can be sure there is no limitation on imagination of what is possible. You can envision, plan, build and manage anything...with Intergalactic Securities.

Something exciting to get you thinking and being a lot more pro-active today...
